## Summary

---

I'm a full-stack developer in progress with a focus on frontend technologies like React and Next.js. Currently building web projects using JavaScript, Firebase, and Stripe, while aiming to grow my backend skills with Python and Node.js. I'm passionate about learning, creating clean UIs, and working on real-world solutions that make an impact.

## Experience

---

### Social Office (Istanbul, Turkey)

Information Technologies Internship

Hibrit

June 2025 – Continue

I participated in projects involving Python, AutoCAD, Photoshop, and Excel, which allowed me to develop my core programming skills. Through these experiences, I also built a solid foundation in teamwork and project coordination.

## Skills

---

**Programming Languages:** JavaScript, Python, C, C#

**Frontend Frameworks & Runtimes:** React.js

**Databases:** Firebase

## Education

---

### Nisantasi University

Computer Engineering, Bachelor of Science

Türkiye

2024 - Continues

During the first year of my Computer Engineering bachelor's degree, I gained introductory knowledge in fundamental computer science concepts, C, C#, Python, algorithms, and data structures. I am also interested in frontend development and actively work with HTML, CSS, and JavaScript.

### Aliya Izzetbegovic High School

Physics Sciences

Türkiye

2019 - 2023

My passion for subjects like mathematics and physics has always guided me. It's this interest that inspired me to pursue a career in the quantitative and engineering fields.

## Certifications

---

### Frontend Web Development

Certified

BTK Academy

2025
